Extensive Analysis of Potential – Power-Potential-Profile® Licensing Workshop

When coaching, training or developing the team, it will be helpful for you to carry out a potential analysis with your participants in advance.

We have developed with the Power-Potential-Profile® (PPP) a tool very suitable for this purpose. The PPP consists of three modules providing answers to the three fold questions. Who am I? What is it I want to achieve? What am I able to do? The PPP is based on a valid theory and evidently has shown strong results in practice. It may only be used by licensed consultants, trainers or coaches.

When attending this workshop you will obtain the licence to use the PPP and as such increase the quality of what you are out to achieve. In a consultation we will clarify conditions regarding the participation.

Target Group

- Personnel developers
- Trainers
- Coaches (internal or external)
- Consultants

This in-house seminar is tailored to your individual needs. Contact us so that together we can develop a tailor-made training concept for you.

Main Focus

- The theoretical foundation of the Power-Potential-Profile®
- The practical application of the three modules of the PPP®:
- JPP – who am I? MDA – what do I want? FSL – what can I do?
- The result report: evaluation and interpretation help
- The evaluation interview: exercises, examples, questions
- Fields of application of PPP® for consulting, training, coaching
- Tips and advice on the use of PPP®

personnell potential: Example Topics from the Seminar Contents

The Power-Potential-Profile®

Personality, attitude and competence - all three dimensions of the Power-Potential-Profile® (PPP) work together and give an overall picture that provides a solid basis for workshops, coaching and training.

The graph below shows that the three modules of the PPP together have a particularly strong impact. In color you can see the shortened evaluation. The learning challenge refers to all three results of the PPP.
